

SURGICAL INSTRUMENT REPAIR SERVICE

During the 1980s, we started Jensen Instrument Technologies to fulfill the need for surgical instrument repair, maintenance and supply. We realized that surgeons and hospital staff were often too busy to take care of the administrative and repair processes involved in surgical instrument repair and equipment maintenance. Furthermore, dealing with the repair and maintenance of surgical instruments took a great deal of time, which practitioners felt could be better spent attending to patients in need.

In order to help surgeons and hospital staff do what they do best, we provide a high-quality solution to the repair, maintenance, and supply of surgical instruments via our expert technicians.

Today, Jensen Instrument Technologies offers the foremost and leading repair service available, led by a group of highly qualified biomedical technicians.

WHY USE THE SURGICAL INSTRUMENT REPAIR SERVICE?

Taking advantage of our surgical instrument repair service ensures peace of mind that every surgical instrument repaired will be as good as new. Here is why:

Expertly Qualified - Our service technicians are trained by the actual manufacturer of each surgical instrument to ensure they excel in the repair of the manufacturers' product(s).

Skills Training - Our service technicians regularly travel overseas for procedural training, updates on surgical instrument repair, and skills workshops.

Continuing Communication - Intercommunication between our technicians and manufacturers are continuous, ensuring the latest techniques and knowledge are deployed in our surgical instrument repair service

Superior Service Experience - Our surgical instrument repair service is widely known for providing the ultimate service experience.

- The rapid and precise quality of surgical instrument repair services embraces all aspects of theatre and central sterilising department (CSSD) requirements.
- The confidence and trust bestowed to Jensen Instrument Technologies by customers applaud this unique and specialised benefit.

WHY SERVICE YOUR INSTRUMENTATION?

Instrumentation, especially surgical instruments, are at the forefront of every procedure. Servicing your instrumentation ensures its reliability and lifespan. The repair and maintenance of surgical instruments are of the utmost importance and should be continually up to date with the manufacturers' specifications and in line with TGA standards. In the end, up to date surgical instrumentation repair and maintenance can make the difference in saving a life.
